

Additional Training and Technical Assistance Opportunities

The CPQ&R was produced by the [Center on Enhancing Early Learning Outcomes](http://www.ceelo.org) (CEELO). CEELO commissioned Third Sector Intelligence, Inc. (3SI) to develop the CPQ, and subsequent revisions, resulting in the current version, CPQ&R released in January 2018. 3SI works in partnership with CEELO staff to revise the calculator and provide technical assistance to users.

One of 22 Comprehensive Centers funded by the U.S. Department of Education's Office of Elementary and Secondary Education, the Center on Enhancing Early Learning Outcomes (CEELO) works directly with states to strengthen their capacity to lead sustained improvements in early learning opportunities and outcomes. CEELO works in partnership with SEAs, state and local early childhood leaders, and other federal and national technical assistance (TA) providers to promote innovation and accountability. The CPQ&R is an embodiment of CEELO's effort to positively influence how states think about expanding their early learning programs (www.CEELO.org).

3SI is a Seattle-based consulting firm specializing in program evaluation, business intelligence, and technology services (www.team3si.com). As the architect of the CPQ&R, 3SI possesses a thorough understanding of its use and application within early learning settings. It offers additional training and technical assistance to users, including customization of the CPQ&R and the design and implementation of major enhancements therein.

For further information and useful materials to use the CPQ&R see our website at <http://ceelo.org/cost-of-early-learning-quality-calculator/>
