## Delaware Expands Preschool Enrollment, But Too Many Children are Still Missing Out

*National report says it's a "time to choose," as states have bounced back unevenly from the pandemic when it comes to preschool enrollment and quality*

**NEW BRUNSWICK, N.J.** - A new national report released today ranks Delaware 41<sup>st</sup> in the nation for preschool enrollment for four-year-olds and 25<sup>th</sup> for three-year-olds.

The National Institute for Early Education Research (NIEER) today released its annual *State of Preschool* report, which tracks preschool enrollment, funding, and quality across states. The 2023 *State of Preschool Yearbook* found that, in the 2022-2023 school year:

- Delaware served 6% of four-year-olds and 2% of three-year-olds in state-funded preschool, for a total enrollment of 954 (an increase of 136 from the prior year).
- State spending totaled \$8,804,300, up \$2,242,819 (34%), adjusted for inflation, since last year.
- State spending per child equaled \$9,229 in 2022-2023, up \$1,207 from 2021-2022, adjusted for inflation.
- Delaware met 9 of 10 research-based quality standards benchmarks for minimum quality recommended by NIEER.

Preschool enrollment in Delaware increased for the first time in 20 years but remains extremely low. The state is poised to make progress in the coming years with an increase in the state's budget for preschool to add seats.

"Our report on the 2022-2023 school year found that Delaware leaders have work to do to improve preschool enrollment and funding. We are excited to see the first increase in seats in the twenty years NIEER has tracked preschool enrollment," said **W. Steven Barnett, Ph.D., NIEER's senior co-director and founder**. "We encourage Delaware to accelerate their progress and expand access to full-day, adequately funded early learning opportunities that will help children develop and parents earn a living."

Nationally, the report finds that this is a critical moment for preschool. The nation has emerged, albeit unevenly, from the COVID-19 Pandemic. States are poised to make new progress toward serving more three- and four-year-olds in high-quality, full-day preschool programs. How each state chooses to move forward – and whether the federal government helps – will determine how much real progress is made. Most states have not committed to serving all children, and even those states that have often fall short. Most states need to increase funding per child substantially to enable providers to meet minimal standards for a high-quality, effective program.

During the 2022-2023 school year, states enrolled over 1.63 million children in preschool, marking a 7% surge compared to the preceding year. Preschool enrollment reached 35% of 4-year-olds and 7% of 3-year-olds, with state expenditures reaching \$11.73 billion—an 11% increase from 2021-2022 when adjusted for inflation. Notably, state spending per child surpassed \$7,000 for the first time. However, despite this notable progress, most states still fell short of their pre-pandemic preschool enrollment. While several states made strides towards achieving universal preschool access, six states persisted in not allocating any funding for preschool programs.

"With the pandemic in the rear view, it is time for states to choose whether they are going to support high-quality preschool and how," said **Allison Friedman-Krauss, Ph.D., the report's lead author**. "Will states commit to serving all four-year-olds? Will states serve both three- and four-year-olds? Will states make the investments needed to ensure that programs are effective? Will states support a mixed-delivery model for preschool incorporating both existing child care programs and public schools? Will states provide a full school-day option for all families who want it? How

will states recruit, support, and retain preschool teachers? These decisions will impact millions of children for years to come.”
